Raspberry Pi Home Server

Introduction

Mel Grubb

@melgrubb | www.melgrubb.com

Who Is This Course For?

IT Professionals

Hobbyists

Geeks

What Is a Raspberry Pi?

- Linux computer
- Single-board
- About the size of a deck of cards
- \$35
- Created for education
- Adopted by hobbyists

What Can It Do?

File Server

Media Server

Backup Destination

VPN Server

Private Cloud

Wordpress Blog Host

Why Build Your Own Server?

- Because it's there

Can It Handle All Of That?

- Raspberry Pi Model A, B, B+ Arm6 Single Core
- Raspberry Pi 2 Model B, Arm7 Quad Core
- Raspberry Pi 2 & 3, A53 Quad Core
- 700 – 1200 MHz
- 512Mb – 1Gb RAM

What Will It Cost to Run?

- Let's assume 1000 mA average
- $5V * 1A = 5W$
- $1000 Wh / 5W = 200$ hours to consume 1 kWh
- Roughly 8¢ per kWh right now
- $24 * 366 = 8784$ hours in a leap-year
- $8784 / 200 = 43.92$ kWh per year
- $43.92 * .08 = \$3.51$ per year
- That's 0.96¢ per day

Prerequisites

Raspberry Pi

Power supply ($> 1200\text{mA}$)

SD card ($\geq 8\text{Gb}$)

Monitor or TV (HDMI)

Keyboard and mouse

Case (optional)

Prerequisites

Home Network

Internet access

Network cable for the Pi

OR an available WiFi network

And possibly a WiFi adapter

http://elinux.org/RPi_VerifiedPeripherals

Prerequisites

External Drive

USB flash or hard drive

Power supply (or powered USB hub)

Summary

- What is a Raspberry Pi?
- What can it do?
- What do you need to get started?

Updates

- Model 3, Zero, and Zero W
- Raspbian Jessie and Stretch
- ~~CrashPlan~~

Updated
